

## CONDITIONS FOR ACCEPTANCE

# Chlorinated solvents in small packaging

<b>EURAL code</b>	070103* - 140602*
<b>Waste code</b>	013017

### DESCRIPTION

Chlorinated solvents in packaging of a capacity of 5 l. or less, packed in larger open head drums.

### ADDITIONAL CONDITIONS

#### Parameters:

- pH > 5
- Chlorine < 40%
- Sediment < 1%
- PCB < 50 ppm
- calorific value > 10,000 kJ/kg

#### General conditions:

- No corrosive or highly toxic products (such as dichlorodimethyl ether).
- No peroxides.
- No polymerising, oxidising or reactive substances.
- No foreign objects (such as wood, stone, glass, rags, plastic lids or metal parts).

#### Packaging conditions:

- The waste must be packed in tightly closed bottles of a maximum capacity of 5 m. [sic] (inner packaging).
- The bottles must in turn be packed in durable UN approved open head drums of 60 l., 120 l. or 200 l., filled with absorbent material (outer packaging). The bottles must be tightly secured using suitable fillers with the closure uppermost so that under normal transport conditions they cannot break.
- The packaging, including the pallets on which the waste is stacked, will be regarded as lost packaging.
