

## CONDITIONS FOR ACCEPTANCE

# Metallic mercury waste

<b>EURAL code</b>	160307*
<b>Waste code</b>	008003

### DESCRIPTION

Metallic mercury waste (quicksilver).

### ADDITIONAL CONDITIONS

#### General conditions:

No other waste that does not meet the conditions.

#### Packaging conditions:

- The waste must be packed in tightly closed strong bottles of a maximum capacity of 1000 ml. (inner packaging). Those bottles must be packed in durable plastic drums of 30 l. or 60 l., filled with absorbent material. The bottles must be tightly secured using suitable fillers with the closure uppermost so that under normal transport conditions they cannot break.
- The packaging, including the pallets on which the waste is stacked, will be regarded as lost packaging.
