

CONDITIONS FOR ACCEPTANCE

HNO₃/HF mixtures

EURAL code	060106*
Waste code	006001

DESCRIPTION

Mixtures of nitric acid (HNO₃) and hydrogen fluoride (HF)

ADDITIONAL CONDITIONS

Parameters:

- Flashpoint > 61 °C
- Liquid
- Sediment < 1%
- pH < 7

General conditions:

- The acids must be physico-chemically processable
- No foreign objects such as rags, wood, plastic, stones, bolts, etc.
- No organic pollutants such as solvents
- Please note: transportation of mixture of hydrochloric acid / nitric acid (= aqua regia) is NOT PERMITTED
- No mixtures of other acids
- No highly reactive or oxidizing products

Packaging conditions:

- Packed in UN approved liquid drums of a capacity greater than 5 litres, in good condition.
- Clear mention of the composition of the waste on the packaging
