

CONDITIONS FOR ACCEPTANCE

Organic bases in small packaging

| | |
|-------------------|---------|
| EURAL code | 070104* |
| Waste code | 699038 |

DESCRIPTION

Organic bases such as amines and mixtures of corrosive and organic substances, in packaging < 5 litres

ADDITIONAL CONDITIONS

Parameters:

- pH: > 7
- Chlorine: < 1 %
- Non-toxic

General conditions:

- The composition of the waste must be clearly mentioned on the packaging
- No ammonia
- No foreign objects such as rags, wood, plastic, bolts, etc.
- No toxic substances
- No nitriles
- No highly reactive products
- No products that cause odour nuisance (such as mercaptans and amides)

Packaging conditions:

- The waste must be packed in tightly closed bottles (inner packaging) of a maximum capacity of 5 litres
- These bottles must in turn be packed in durable UN approved open head drums (outer packaging) of 30 or 60 litres, filled with absorbent material
- The max. weight of the drum is 20 kg
- The bottles must be firmly secured with the closure at the top using suitable filling materials so that the bottles cannot break under normal transport conditions
