

CONDITIONS FOR ACCEPTANCE

Bituminous roofing membrane

DESCRIPTION

Bituminous roofing membrane from demolition or renovation of roofs

Permitted

- Bituminous roofing membrane
- Adhering contaminants such as insulation material, wood, roofing gravel, aluminium roofing strips, etc. <5 v%

Bituminous roofing membranes have been used since 1975 and must be offered separately from tarred roofing membrane.

Bituminous roofing membranes can be recognised by the following properties:

Tough material, can be easily cleared from gravel, does not melt when heated, has a sweet smell, is difficult to cut.

Prohibited

- Hazardous waste
- Construction and demolition waste
- Asbestos or suspect asbestos-containing materials
- Iron and steel profiles, strips, chains, etc.
- (Contaminated) soil
- Commercial waste
- Insulation materials, demolition waste, sand and/or soil, rubble from chimneys, roofing gravel >5 v%

** If, upon delivery, deviations are found from the described conditions, Renewi Nederland B.V. reserves the right to refuse the consignment in question or to accept it according to amended conditions.*

*** Your obligation and opportunity to separate can be found in the National Waste Management Plan (LAP)*
